

INSECTICIDE SPRAYERS

DYNA-FOG® TRAILBLAZER SPRAYER

The Trailblazer provides big machine performance in a compact, easy to handle package. This battery operated unit is designed to handle oil-based products. The high output of non-residual, thermal fog is great for both indoor and outdoor applications. The unit produces a "dry fog" and is ideally used to eliminate the flying insect, such as the Indian Meal Moth, found in a warehouse or barn. The unit uses six (6) "D" size batteries and has an electric start (batteries included). The removable, easy-to-clean tank has a 1 gallon (3.8) liter capacity. Output: 0-5 gallons/hour (0-19 liters/hour). Ship Dims. 35" L x 15" W x 22" H. Ship wt. 41 lbs.

Trailblazer Sprayer No. TRLB

DYNA-FOG® DC-3 SPRAYER

The DC-3 Sprayer is an electric, portable aerosol applicator. A meter valve allows the operator to adjust the output. Three (3) precision nozzles combine to give a greater capacity. The durable body is constructed from a high-density polyethylene, chemical resistant material. Designed to handle both water and petroleum based products, the DC-3 is capable of dispersing germicides and insecticides. Most commonly used with malathion where a residue or "top dressing" on the grain or bin walls is desired. This application eliminates the crawling or nesting insect. Motor: 6.85 amps, 50/60Hz cycle, 20,000 RPM. Tank Capacity: 1 gal. (3.8 liters). Ship Dims. 15" L x 10" W x 18" H. Ship wt. 10 lbs.

DC-3 Sprayer, 110V No. DF
 DC-3 Sprayer, 220V No. DF/A

SEEDBURO INSECT TRAP

Our insect trap early warning system lets you monitor insect activity in stored grain. Trap is made of tough, long lasting perforated plastic and is 17" long. The tip is the reservoir for insect collection. The Seedburo Trap can be used with or without pheromones or food attractants. For best results in 20 ft. dia. bins, place one probe in the center and one trap in each quadrant of the bin. Check traps within 24 hours of placement to detect crawling insects. If two or more of any insect species are caught in the first two hours, there is the potential of a treatable population. Traps sold in cartons of 3. Dims. 17" L x 1 1/4" dia. Net wt. 8 oz., Ship wt. per carton 1 lb.

Insect Trap, ctn. of 3 No. TRAP1

RAT BAIT STATION

The safe, sure way to kill mice and rats. Mice and rats can get inside to feed, and out again. Large feeding receptacles hold pelleted bait. Made of heavy-duty, injection molded plastic. For use indoors and out, especially around the perimeter of buildings to keep rodents from entering.

Bait Station, case/4 No. BAIT1

JAQUAR® RODENTICIDE AND CHUNX®

Highly effective on both rats and mice. Especially successful in cleaning out tough mouse infestations where populations are difficult to control or where resistance is suspected. Palatable bait that rodents eat readily.

JAQUAR® RODENTICIDE - The Rodenticide is a palatable bait available in place packs which mice and rats chew open. Package of ten 25g place packs No. BAIT2

JAQUAR® CHUNX - Each 20g Chunx features multiple gnawing edges. A low-wax extrusion process produces a bait that is highly resistant to weather. 1 1/4 lb. Pail No. BAIT3

Note: Cannot be sold internationally.
