

## HAY AND STRAW MOISTURE TESTERS

The digital F2000 and the analog F6 Moisture Testers are used to check the moisture content of hay before baling and to check the moisture content of bales for safe storage. Each unit comes complete with a No. 1235 10" prod (attaches directly to meter). Other prods are available for testing moisture in hay stacks, windrows, small & large bales or chopped hay. The F2000 has a moisture range of 8-40%. It can store up to 100 readings and display the average and highest of the accumulated readings. It also features an adjustable, audible set-point to alert you when a pre-selected % of moisture has been reached. The F6 has a 13-40% moisture range. Also available: our F6-L with low moisture range of 6-30%. All units: Actual dims (meter) 3" L x 1 3/4" W x 7" H. Ship wt 2 lbs. Ship Dims 13" L x 10" W x 6" H.

Digital Hay Moisture Meter With 1235 10" Prod .....	<b>No. F2000</b>
Analog Hay Moisture Meter With 1235 10" Prod .....	<b>No. F6</b>
Analog Hay Moisture Meter, Low Range, With 1235 10" Prod .....	<b>No. F6-L</b>
Carrying Case for F2000 and F6 Models .....	<b>No. 324CAS-0065</b>

## COLORADO HAY PROBE

The Colorado Hay Probe offered by Seedburo is a rugged, durable low-cost probe made of aluminum alloy with a replaceable stainless steel tip. Features an easy to use "push in" design. Unit can be used on all bale sizes and for all types of baled forages. The 18" probe cuts a 5/8" dia. core sample. The chamber holds approximately 10-15 cores. Ship wt 6 lbs. Ship Dims 48 1/2" L x 3" dia.

Colorado Hay Probe .....	<b>No. CHP1</b>
Replaceable Tip, Stainless Steel .....	<b>No. CHPT</b>

## SEEDBURO HAY SAMPLER KIT

Seedburo's Hay Sampling Kits are made of heavy stainless steel that quickly and easily extract samples from hay bales. The HSK-90 Open Tube Kit allows the sample to be removed from the side of the tube so there is nothing to take apart. The HSK-91 Closed Tube Kit encases the sample completely. A dowel rod is used to extract the sample from the tube. Extension rods are available for deep core sampling. The tube features a screw-on serrated tip that cuts through hay bale with help from hand brace. An adapter is also available for 1/2" power drill. Ship wt (kits) 10 lbs.

Hay Sampling Kit, Open Core Complete with 18" Open Tube, Tip, Dowel Rod and Hand Brace .....	<b>No. HSK-90</b>
Hay Sampling Kit, Closed Core Complete with 18" Closed Tube with Tip, Dowel Rod and Hand Brace .....	<b>No. HSK-91</b>
Open Tube Hay Probe with Tip Only .....	<b>No. OT-117</b>
