No. 98995

PRO PAC VAC BACKPACK

The Pro Pack is an effective and efficient alternative to traditional upright vacuum cleaners. Cleaning tasks from vacuuming carpets and hard floors, low and high dusting, to detail work are handled with ease. There are two models to choose from, the Pro Pac 6-quart or the Super Pro Pac, 10-quart unit - both with quad-filtration to address indoor air quality issues.

Both vacuums feature slim, rotationally molded bodies designed to eliminate heat transfer from the motor of the unit to the operators body - a common complaint with traditional backpack units. With comfortable molded-in back braces, adjustable shoulder straps and belts, each vacuum provides a comfortable and secure fit for the user and a molded-in carrying handle adds to the ease of use. The Pro weighs 9 lbs., and the Super Pro is 10.5 lbs.

With 1.5 hp, the Tornado Pac Vacs achieve a static lift of 100 inches and airflow of 150 CFM at a quiet 67 decibels. Using applied suction, the units will recover paperclips and other debris that upright vacuums cleaners often struggle with. Both models come complete with filter (one) and attachments including a two-piece aluminum wand, 4' vacuum hose with smooth core, crevice tool, round dusting tool, upholstery tool and a 14" scalloped carpet tool. Units are only available in 110V/60Hz. Pro Pac measures 8" W x 23" L and the Pro Pac Super is 9.75" W x 24" L.
