| Seeders for John Deere Max-Emerge II plateless planter, forward drive position ..... | No. SCTS-5 |
| Seeders for John Deere Max-Emerge II vacuum planter, rear drive position .....       | No. SCTS-6 |

## PRECISION BELT CONE SEEDERS

The Seedburo Cone Seeders are designed for planting small seeded crops such as grasses and vegetables. They can also be used for larger seeds in multi-crop applications and are mounted on existing planters. A 10" diameter aluminum cone is supplied with a highly polished finish which is corrosion resistant and has a close tolerance for small seeds. The belt assembly is self-cleaning and designed for long life and smooth operation. Complete with smooth cast aluminum cone, seed belt and adjustable roller assembly, 3" inside dia. seed cup, metal frame with mounting brackets, 12V solenoid unit and electrical cord, cone drive coupling, plexiglass windshield and divider funnel. **NOTE: Purchaser must supply necessary drive parts from the commercial or custom planter unit being used in order to supply proper mounting brackets.**

| Seeders for John Deere Max-Emerge II vacuum planter .....           | No. SBCTS-6 |

## MINI CONE TYPE SEEDERS

Seedburo Mini Cone Type seeders are specially geared for planting shorter rows and low populations. The 14 cell, 6" diameter cone is designed to provide better spacing control for low population rows than would be obtained with a standard cone. The polished aluminum cones are provided with electric lift seed cups. Divider funnel is standard on both styles. **NOTE: purchaser must supply necessary drive parts from the commercial or custom planter unit being used in order to supply proper mounting brackets.**

### Electric Seed Cup Lift
